

**Red Bull U.S. Grand Prix
AMA Pro Road Racing Championship
Mazda Raceway Laguna Seca, Monterey, CA
July 3-5, 2009**

**Supplementary Regulations
(5/28/2009 – subject to change)**

EVENT

The Red Bull U.S. Grand Prix is Round #7 of the 2009 AMA Pro Road Racing season, featuring AMA Pro National Guard American Superbike presented by Parts Unlimited, AMA Pro Daytona SportBike presented by AMSOIL and AMA Pro SuperSport presented by Shoei races.

CIRCUIT

Course length is 2.24 Mi / 3.60 Km for all classes. Pit wall height is 2' 8". All AMA Pro Racing flagging and signaling will take place on the Official Starter Stand on the front straight. **A repeater flag station will be located at turn 5.**

LICENSES & CREDENTIALS

All riders and entrants in the event must be members of AMA Pro Racing and hold valid 2009 licenses. Every participant entering the facility is required to have a valid credential issued by AMA Pro Racing or the race facility. The lanyard issued with the AMA license/credential is considered part of the license/credential and must be used together with the license/credential. All riders must hold a 2009 AMA Pro Racing license or a current FIM International License issued by the rider's FMN. Foreign participants are required to submit a copy of their current FIM or National license, and a letter issued by their National Federation confirming insurance coverage and giving permission to participate in this AMA Pro Racing event. Licenses will not be issued at the track.

ENTRIES

Entries close for all classes except SuperSport on June 1, 2009, with a Late Entry deadline of June 8, 2009. Entries received after the entry due date will not be accepted. Entries must be received by AMA Pro Racing no later than the established entry due date for each event or the late entry fee will apply. Post entries for SuperSport licensed riders will be accepted only on Thursday, June 4th at Registration at the Embassy Suites hotel in Seaside from 3:00pm to 7:00pm.

REGISTRATION/CREDENTIALS

Registration will be located at the Embassy Suites hotel in Seaside. Riders, entrants and crew may pick up their season credentials or register for single event credentials. A photo ID must be presented to obtain a credential. **AMA Pro Road Race hard card credentials will be accepted at the track during this combined MotoGP event, however, AMA Pro parking credentials will not.** All AMA Pro-issued P1 and Transporter pass holders must present photo ID at Registration and the holder will be issued a MotoGP Blue 2 parking pass, which will allow parking on the hillside adjacent to the main paddock entrance. As a convenience to riders and teams, an AMA Pro official will be at Laguna Seca from 10:00am-2:00pm on Thursday at the AMA Pro Tech truck in the paddock to issue parking passes.

PRE-EVENT RACE TRANSPORTER STAGING

Pre-event race transporter staging will be on South Boundary Road on Wednesday, July 1st from 7:00am – 7:00pm. No race transporters will be allowed on A Road off Highway 68. Transporter washing is not allowed in the paddock area, but may be done in Red 9 Parking Lot by Steve Kostelac with A-1 Polishing, 909-563-6893.

PADDOCK PARKING

Race transporter paddock parking will be from 8:00am to 5:00pm on Thursday, July 2nd, starting with transporters staged on South Boundary Road. AMA Pro Racing credentials are not required on Thursday, but may be purchased at AMA Pro Racing Registration starting at 3:00pm. Starting Friday, only race transporters and service provider vehicles displaying a TRANSPORTER parking pass are allowed in the paddock area and must

park within the team's paddock footprint. Rental cars, buses, motor homes or other vehicles will not be permitted in the paddock without prior approval of AMA Pro Racing or the facility. Paddock is open 24 hours daily for credential holders. **All race teams, transporters and RVs must clear the paddock by 12:00 noon on Monday, July 6th.**

TEAM, RENTAL AND PERSONAL VEHICLE PARKING

All AMA Pro-issued P1 and Transporter pass holders must present photo ID at Registration and the holder will be issued a MotoGP Blue 2 parking pass, which will allow parking on the hillside adjacent to the main paddock entrance.

Only race transporters and service provider vehicles are allowed in the Laguna Seca paddock. Riders with tow vehicles will be issued a parking pass at AMA Pro Registration and must park within the teams' paddock footprint.

PIT LANE ASSIGNMENTS

Pit lane assignments for all classes are based on current season point standings. The top teams for all classes will be assigned pit areas first, followed by the remaining teams in the point standings. First-time and one-event teams will be assigned pit areas last. Each team is allotted a 10' section of wall per rider for their canopy unless otherwise directed. No tent stakes or tying canopies to electrical conduit in the pits or paddock is permitted.

PIT LANE SET-UP FOR PRACTICE, QUALIFYING AND WARM UPS

For this combined MotoGP event, canopies may be erected only at the beginning of your specific AMA Pro Racing class session, and must be taken down at the end of the session. All equipment including canopies must be removed from the hot pit for any MotoGP activities.

During AMA Pro set-up, only two crew members per bike are allowed into the COLD pit to plug in tire warmers. All crew must leave immediately after set-up. Only motorcycles, generators and tire trees are allowed in the cold pit at this time. Nothing may be placed on the wall or the hot side of the pit lane until given permission by AMA officials. Details on set-up times will be available at the event.

RVs AND CAMPING

Limited paddock camping for registered AMA Pro Racing participants and officials is available in the paddock. Contact Ryan Hundley with Mazda Raceway Laguna Seca at 831-2142-8222 or ryan@mazdaraceway.com to make reservations. Pets are not allowed in the paddock area at Laguna Seca.

MANDATORY BRIEFINGS

All riders and entrants must attend the pre-practice and pre-race briefings as published on the schedule and check in with AMA Pro Racing staff. All briefings will be held at the AMA Pro Tech truck in the paddock.

PACKAGE SHIPPING & RECEIVING

Packages shipped to the track must be identified with a contact name and team name on the shipping label for correct sorting. The shipping address is:

Contact Name
Team Name
Mazda Raceway Laguna Seca
1021 Monterey-Salinas Hwy.
Salinas, CA 93908
Phone: 831-333-4205

Packages can be picked up at the Concessions building located at the back of the paddock adjacent to the main paddock entrance.

SCORING TRANSPONDERS

Once a rider is issued a scoring transponder (including teams using their own hard-wired or rechargeable transponders), it must be properly mounted, charged and operational at all times when on track. Riders who pre-enter for the season will be issued one (1) hard-wired transponder per class. Riders who pre-enter single events will be issued a rechargeable transponder at no cost. Additional transponders can be purchased. Riders will be responsible for the loss or damage to transponders, unless the loss or damage is the result of a verified on-track crash during official practice, qualifying or race at the event. Remember to return transponders at the completion of your event to AMA Pro Racing Tech Inspection.

TIMING BEACONS

Timing Beacons should be placed at a minimum of 10' intervals in a safe and secure manner on riders left near the start/finish line.

SIGNAL AREA

The rider signal area is along the wall adjacent to the front straight. Access is restricted to personnel presenting a valid AMA Pro Racing Crew Credential and who meet the dress code as outlined in the 2009 AMA Pro Racing Rulebook. Each rider is permitted a maximum of two team personnel in the signal area. Team personnel must stay in the area designated for signaling. Signaling is not permitted in any other area.

OPEN "CONTROL" RADIO FREQUENCY FOR TEAMS

Teams may use radios to monitor Race Control at 461.4750203.5. It is strongly encouraged that all teams have one crew member monitor this "listen only" control channel during all on-track activity.

SCOOTERS/PIT VEHICLES & BICYCLES

All scooters or pit vehicles used in the paddock must display an AMA Pro Racing-issued sticker. These are available in a limited number at Tech Inspection. Scooters and other pit vehicles will not be allowed in the cold pit area and must be parked adjacent to the entry gates. All scooters or pit vehicles that leave the paddock must be licensed and street legal, and all riders are required to wear helmets. Bicycles are not allowed to be ridden in the paddock.

TECHNICAL INSPECTION

All machines must be presented for technical inspection in the designated area prior to participation in their initial practice session and when requested by AMA Pro Racing.

FUEL

The official fuel of AMA Pro Road Racing is Sunoco 260GTX Racing Gasoline (98 octane unleaded). Fuel will be dispensed from a truck by Paul Oil Company located in the paddock. They will accept MasterCard, Visa, cash and checks.

Fuel Service Hours

Thursday: 3:00pm - 7:00pm
Friday: 7:30am - 5:00pm
Saturday: 7:30am - 5:00pm
Sunday: 7:30am - 12:00pm

Based on AMA Pro Racing's move to a spec fuel it is imperative that we review basic fuel handling procedures to be used in the paddock and on hot pit lane.

All refueling must be done outside of the garages or team canopies. Refueling in a well ventilated area should help eliminate vapor build up.

A fire extinguisher must be in the immediate vicinity and ready for use during all refueling procedures.

All components of the fueling procedure need to be grounded the entire time. This includes the fuel source, the refueling personnel and the machine. The more positive the grounding method, the better.

Particular care should be taken when using plastic fuel bottles as static build up and discharge is more prevalent with plastic.

All fuel jugs being filled from a large drum should be placed on the ground before and during filling.

Supply drums should be on the ground as well, not in the transporter or bed of a pickup truck.

When removing the funnel or pump from the fuel container keep it physically in contact with the container while the last of the fuel drains out. Fuel that drains from a funnel or pump creates an electrical charge. If the pump or funnel breaks ground with the container or drum while this is happening it will create an electrical discharge in the form of a spark and can create an undesirable hazardous condition.

TIRE REGULATIONS

Competitors may only use tires distributed and mounted by Dunlop at each event. Dunlop will provide AMA Pro Racing a list of compounds and markings for tires available to the competitors at the beginning of each event. Dunlop will provide AMA Pro Racing with several sample sets of tires of each available compound at the beginning of each event.

During free practice, qualifying, warm up and race, no motorcycle is allowed on the race course with tires that are not properly tagged. Penalties for violation of this policy may be assessed by AMA Pro Racing.

In the case of a dispute AMA Pro Racing may exchange a competitor's tire or tires with a tire sample under AMA Pro Racing's control. The exchanged tires will remain under technical control and may be exchanged for the tires of another competitor.

TIRE CONTROL

At each event, from the first practice until the conclusion of racing, each American Superbike and Daytona SportBike competitor will be allowed nine (9) rear tires and six (6) front tires. Each competitor that qualifies for Super Pole will be allocated one (1) additional set of tires.

Competitors in SuperSport will be allowed four (4) rear tires and four (4) front tires.

Entrants will be given their sticker allocation at the beginning of each race weekend during their initial technical inspection.

All tires used in official practice sessions, qualifying sessions and race events must be marked with an assigned adhesive backed sticker on the left sidewall. There will be a designated area that all competitors must ride through to have their stickers monitored.

It is the responsibility of the entrant to maintain control of the stickers and to make sure they are properly located on the tire before the bike goes on track. At the end of the weekend all unused stickers must be returned to tech inspection or a penalty may be assessed.

If a sticker is damaged upon installation or a new or near new tire is damaged, a competitor can request a replacement sticker or replacement tire from AMA Pro Racing. Dunlop and AMA Pro Racing will make the final determination on damaged tire replacement. AMA Pro Racing will make the final determination on damaged stickers.

In the event of a red flag:

No additional tires will be allocated for a red flag situation.

If a red flag is displayed during Superpole, affected riders may be allowed a replacement set of tires at the discretion of the technical director.

In the event of wet racing conditions:

American Superbike entrants will be allowed three (3) rear intermediates (DOT) and three (3) front intermediates (DOT) that will count against their tire allocation.

In American Superbike and Daytona SportBike, competitors will be allowed four (4) full wet rear and four (4) full wet front (Double Header Race Event) or three (3) full wet rear and three (3) full wet front (Single Race Event).

Competitors in SuperSport will be allowed two (2) full wet rear and two (2) full wet front.

Full wet tires will not be deducted from a competitor's tire count for the race weekend.

BACK-UP BIKES FOR RAIN RACES & PRACTICE

During practice and qualifying only the primary bike may be on the hot side of the pit wall except for the last 15 minutes of the first practice session of either American Superbike or Daytona SportBike.

Per the 2009 AMA Pro Road Race Rulebook, a backup bike may only be used in a race during a red flag situation if the leader has completed two laps or less. After the leader has crossed the start finish line for the third time the backup bike is no longer a viable option. If a rider chooses to use his backup bike he must start from the back of the grid.

If a dry race is red flagged within two laps and declared a wet race, a rider may use his backup bike for the wet, but must start from the back of the grid. Riders will be given at least 20 minutes to make changes to their primary bike for wet conditions.

If the riders have not had an opportunity to ride in the existing conditions, AMA Pro Racing will hold a 10 minute practice session for acclimation purposes. A dry race changing to wet is the only situation, other than safety items, that a crew can perform work to the machine during a red flag.

In wet practice sessions, a backup bike may be used as a wet bike freely. Fairing drain plugs must be removed and full wet tires fitted. Primary bikes may only be used with slicks or intermediate tires. Fairing drain plugs must be installed.

QUALIFYING

The maximum number of riders for American Superbike is 36, Daytona SportBike and SuperSport is 44. Riders may only continue to practice in classes that they have earned a grid position in. **Pole position is on the left side.**

TIMED QUALIFYING PROCEDURES FOR A AND B SESSIONS

The fastest time for each rider from the first day of official practice will determine which group the rider qualifies with.

Group A will be the faster half and group B the slower half. If groups cannot be divided equally, the extra rider will be placed in group B.

A list of riders in each group will be posted following practice. It is the responsibility of each rider to qualify with the correct group. Riders that qualify in the wrong group will be placed (if qualified) at the back of the grid for the race.

If AMA Pro Racing determines that track conditions have changed significantly between the two qualifying sessions, group A riders will be placed on the grid in front of group B riders. Each group will be sorted by times from their respective sessions. A point for earning pole position will be awarded.

Ties in qualifying times will be broken in favor of the rider who achieved the time first.

A rider's best lap time must be within 110% (108% for American Superbike) of the fastest qualifying rider's best lap time in order to pre-qualify for one of the available grid positions in the final.

At the discretion of AMA Pro Racing, the qualifying percentage regulation may be waived due to special circumstances such as track delays resulting in an extreme reduction in qualifying time, significant changes in weather conditions, etc. Individual rider circumstances will not be considered as sufficient reason to waive this requirement.

Should a qualifying session be stopped with less than 50% of the designated time remaining, the session may be considered complete at the discretion of the AMA Pro Racing.

Any qualifying session stopped with 5 minutes or less remaining will be considered complete.

TRACK CUTS / RUNNING OFF THE TRACK

Any rider who runs off the track must re-enter the course safely and from the closest point to where that rider left the course, without gaining a time or position advantage. Once his machine is under control, the rider must raise a hand and check to see if it is safe to re-enter the course. Any rider deemed to have cut the track during practice or qualifying will have the lap time from that lap and the subsequent lap removed from the session. During a race event, AMA Pro Racing will make the determination as to whether a rider gained any advantage by leaving the race course and re-entering, and will determine the appropriate penalty for the infraction.

PIT LANE SPEED LIMIT

The pit lane speed limit for all classes will be 50 mph at all times.

The penalty for violating the pit lane speed limit during a race will be a ride-through penalty. *If you repeat an infraction (i.e. Speeding on a ride through penalty) you will be assessed a time penalty.*

Enforcement of the pit lane speed limit will be via radar guns placed at either end of the pit lane and a speed trap(s) set up in the pit lane

The first practice session for each class will be designated for competitors to dial in their pit lane speeds. Warnings will be issued for minor overages during this practice session. Serious infractions will result in fines.

RIDER AUTOGRAPH SESSION

Details of the mandatory rider autograph session on Sunday will be announced at the event. Riders must wear their team shirts and should bring their own signing stock. AMA Pro Racing will supply series stock to those riders without posters.

RACE STARTS

A rolling start will be utilized for the Daytona SportBike class.

A standing clutch start will be utilized for the American Superbike and SuperSport classes.

SAFETY CAR PROCEDURES

The primary purpose of using the Safety Car is to consolidate the field in an effort to safely resolve on-track incidents without the need for a complete race stoppage.

All on-track sessions will be started with all teams using the Safety Car.

When the lights are on, stay with/behind the Safety Car.

When the Safety Car lights are turned OFF, the track will go 'Green' at Start/Finish.

For Practice, the Safety Car will lead the field from the pits, single file in no specific order for a minimum of one lap before releasing the field. In the event of a red flag during practice, the Safety Car will lead the restart with the field in single file with no specific order straight onto the racing surface. All teams need to join or they will be penalized.

ON-TRACK INCIDENTS REQUIRING FULL COURSE CAUTION AND SAFETY CAR

Once the corners display waving yellow flags and the Safety Car signs, no passing is allowed.

The Safety Car will enter track from PIT OUT on riders right.

Line up in single file behind Safety Car.

The Safety Car will attempt to pick up the leader but not always; the leader will be found before restart; competitors could be waved by more than once.

In addition to strobes and flashing roof lights, the Safety Car has a red 'stay-behind' light and a green 'pass' light in the rear window. Hand signals may also be used from the passenger side of the Safety Car.

Always pass the Safety Car on the right when indicated by green 'pass' light. Pass one at a time. No passing in pairs or in groups. When in doubt, pause to pass but do not delay once past the Safety Car.

After passing the Safety Car proceed at NEAR RACE speed to catch up to the trailing end of the group behind the Safety Car. There is still no passing unless you are clearly motioned on by a rider who is having mechanical difficulties. If you choose to allow riders behind to pass, or you must pit, stay well off the racing line and wave the other riders by.

Remember to watch for emergency staff and vehicles on course, possibly at several locations.

The pit lane exit is closed when Safety Car crosses the start/finish line until the entire pack is well clear of the pit lane exit – obey AMA Pro Racing signals at the pit exit.

When the Safety Car turns off the roof lights, it indicates the track will be going "Green" for restart. The Safety Car will exit the track onto pit lane and may not be passed by any rider choosing to enter the pit lane until it has pulled onto pit lane proper, and then must be passed only on the right side.

Once the Safety Car exits the track, the lead rider will control the pace of the field and should bring the field through the last turn to the start/finish line at a moderate pace until the green flag is displayed. Riders should continue single file and maintain a tight field with no more than two bike lengths between each motorcycle. Attempting to slow down for the purpose of "getting a run" on the motorcycle in front of you may result in a ride-through penalty.

RED FLAG

Should it become necessary to halt the race temporarily, the RED FLAG will be shown at the start/finish line and at all turns.

When the red flag has been displayed, riders must slow and proceed to pit lane and park as instructed. Bikes may be placed on stands and tire warmers installed without generators. Do not service bikes in pit lane prior to instruction from AMA Pro Racing staff.

CLARIFICATIONS

Meatball flag is for penalty, Black flag is for mechanical. All AMA Pro Racing flagging and signaling will take place on the Official Starter Stand on the front straight. A repeater flag station is located at turn 5.

RACE START PROCEDURES FOR DAYTONA SPORTBIKE ONLY

For the Race Sighting Lap, the Safety Car will lead the field from the grid, in your allocated grid position two-by-two, for a complete sighting lap and return to pit lane. All teams are required to take part.

For the Race Start, the Safety Car will lead the field from the pits, in your allocated grid position, two-by-two for one lap before releasing the field for the start:

Corner stations will show waving yellow and Safety Car signs. When the Safety Car (roof lights off) has pulled into the pit lane, maintain your speed and do not pass until you've crossed the start line, regardless of position in the pack. Riders may not pass until they cross the start/finish line after the track goes green.

DRESS CODE

The dress code for pit road will be enforced at all times. Approved team uniforms must be worn at all times by team members working on the hot side of the pit wall. All competitor and team clothing, including riding gear, must carry the official series identification items as listed by AMA Pro Racing.

NATIONAL ANTHEM

Pit crews participating in any race preceded by the opening ceremonies are requested to line up outside their pit box during the playing of the National Anthem. Please turn off all bikes and equipment during pre-race ceremonies.

ADVERTISING

- A. Advertising on motorcycles is subject to approval of AMA Pro Racing. All motorcycles must carry the official series identification items including the official series tire and fuel identification on each side of the motorcycle, as directed by AMA Pro Racing, and no other tire or fuel company logos may be displayed at any time.
- B. All competitor and team clothing, including riding gear, must carry the official series identification items as listed by AMA Pro Racing, and no other tire or fuel company logos may be displayed at any time. Identification items will be available in limited supply at Tech Inspection.

MERCHANDISE DISPLAY/SALES

The sale of products or services in the paddock is strictly prohibited. Handouts and product samples must be approved by AMA Pro Racing prior to each event. Sponsor signage and display items are allowed only on race team trucks and transporters and within the footprint assigned. AMA Pro Racing reserves the right to remove any such items that they believe to be unwholesome or otherwise inappropriate.
